ABOUT AMBER

GHANA TECHNOLOGY UNIVERSITY: expenses do no not have to be made by the school to provide photocopies of past questions to the library for students to access. Also, the system would help eliminate the manual way of storing past question. Moreover, good academic performance from the students also gives the school and its staff a good reputation. It would also increase the visibility and prestige of the institution depending on the content it contains. The more quality work the institution puts in its repository, the more likely it is for the institution to be recognized worldwide for its good work

- **Lecturers:** lecturers are able to upload recently written examination questions for students to download. This can also be used by the lecturers as reference to give assignment or extra practice for student to perform and report back
- **Students:** students are able to download their past questions onto their phones which give them the convenience to access past questions anywhere they are as well as do extra studies and also broaden their understanding as it prepares them for their semester examination. They no longer have to go to the library for past questions. It also boast the confidence of the student since they do not need to go to the exams hall with low expectations as to how the questions are going to be set as well as gives room for discussions where ideas and views are analyzed.

The following objectives were set out in order to achieve the aim

- To investigate how the school stores its past examination questions.
- To examine the requirement and specification in designing a good user interfaces with flexible user friendly abilities.
- Identify the necessary tools, techniques and skills to set up the appropriate system.
- Develop an interactive android application for past examination questions.
- To design a database that will serve as the information bank: every system must have a database where all information that will be used will be kept.

- To develop a system that will enable students to download or view past examination questions as well as receive update to new or current past exam questions.
- To design a platform that notify student for new update.
- To design a section for comment to help student gain clarification on based on any related issue
